

Cloud Computing Architect (M/F)

To increase our development in the Paris area, we are looking for a Cloud Computing Architect.

JOB DESCRIPTION

In the context of transformation projects for our customers (mainly Intermediate-Sized Enterprise), your role will be to support and advise customers in the analysis of the existing system and the transition management.

You will be responsible for:

- Conducting workshops to enable analysis of the existing system
- Collecting the needs of customers in order to support them as far as possible on topics related to the evolution and transformation of their IT
- Conducting preliminary studies on supporting IT transformation
- Defining plans for integration and transition with the existing system
- Measuring the appropriateness and benefits for our customers of implementing "Cloud" solutions
- Assisting our customers in defining the target solution
- Developing recommendations for operation management services of the solution
- Contribute to the transformation of practices and uses

PROFILE

Engineering school or university graduate with 5 to 10 years experience, a strong technical IT foundation (networks, infrastructure, OS, middleware, applications architecture, security, open source) and knowledge of IT operation management services.

REQUIRED SKILLS

- Ability to analyse existing systems
- Full grasp of the private or hybrid Cloud Computing services on the market (IaaS, PaaS, SaaS)
- Understanding of desktop virtualisation
- Strong knowledge of on-demand services
- Strong knowledge of provisioning engines
- Understanding of portal tools

- Strong knowledge of mobility, access and roaming mechanisms
- Ability to define a service catalogue
- Strong knowledge of optimisation of operational IT services
- Excellent IT architecture skills (infrastructure and application mapping, flow diagrams, functional and technical vision)
- Knowledge of repositories (best practice, norms and standards) relating to IT (ITIL, ISO20K, e-SCM, Cobit)
- Basic knowledge of IT security (ISO 27000)

PERSONALITY

- Sense of service
- Good communication and interpersonal skills
- Sense of initiative and high degree of autonomy
- Writing skills (French and English)
- Strong process and procedure development skills
