

## **Virtualization Architect (M/F)**

To increase our development in the Paris area, we are looking for a Virtualization Architect with in-depth knowledge of Microsoft Hyper-V and/or VMware.

### **JOB DESCRIPTION**

In the context of transformation projects for our customers (mainly Intermediate-Sized Enterprise), your role will be to support and advise customers in the analysis of the existing system, design, implementation of the solution and the procedures necessary for the operational management services of the solution.

You will be responsible for:

- Conducting workshops to enable analysis of the existing system
- Proposing virtualisation solutions
- Designing the general infrastructure architecture based on the specifications of the company (topology, performance, functionality, security, applications)
- Defining plans for integration and transition with the old system
- Managing the deployment of the solution
- Developing recommendations for the operational management of the solution

### **PROFILE**

Engineering school or university graduate with 5 to 10 years' experience in the field of infrastructure and/or IT operations.

### **REQUIRED SKILLS**

- Ability to analyse existing systems
- Autonomous writing of technical architecture and operational files
- Management of architecture studies ahead of integration projects by incorporating server and storage infrastructures
- Establishment of a server virtualization infrastructure from A to Z incorporating Hyper-V or VMware technologies
- Good knowledge of Unix, Linux and Windows
- Good knowledge of storage and SAN/NAS
- Good knowledge of LAN/Data Centre networks
- Use of conversion tools (physical machine to virtual machine)
- Awareness of Cloud Computing
- Virtualization Administrator certification for Microsoft or VMware would be a significant advantage
- Ability to transfer virtualization knowledge to operational teams

## **PERSONALITY**

- Sense of service
- Good communication and interpersonal skills
- Sense of initiative and high degree of autonomy
- Writing skills (French and English)
- Strong process and procedure development skills
